By Tennessee Medical Association

We are pleased to share an educational opportunity made available through our relationship with the Tennessee Medical Association and its partnership with the Tennessee Foundation for Quality Patient Healthcare (TFQPH). This program provides practical guidance on evidence-based prescribing practices, real-world clinical scenarios, and Tennessee's chronic pain guidelines.

All Tennessee prescribers are required to complete controlled substance education. **Know More No More: Ending Tennessee's Opioid Epidemic** was launched in late 2025 to fulfill

that requirement while providing the latest information on opioid prescribing guidelines and best practices.

This self-paced online course offers **2 hours of CME credit** upon completion. Developed by the Tennessee Foundation for Quality Patient Healthcare and funded through a grant from the Tennessee Opioid Abatement Council, the program was created by Tennessee physicians for Tennessee physicians and includes instruction on the state's Chronic Pain Guidelines.
